

InGamePlay Ad Placement

The episodic storyline is a perfect way for DevOps Studio to monetize with InGamePlay brand advertising in this popular simulator game Anime High School Girl Life 3D.

Players can attend classes and take part in sports activities while navigating the school to complete tasks and follow the storyline in this exciting new game by DevOps Studio.

Ads are seamlessly integrated in key locations e.g. where the player takes part in mini-games, guaranteeing that they will be seen as the player progresses through the game to maximise impressions and monetization.

“

InGamePlay brand ads helped us to improve user retention without affecting the revenue.
